

HRP Goat Anti-Rabbit Recombinant Secondary Antibody

Cat: HKS23208**Company:** HaoKebio**Organism:** Goat**Applications:** ELISA: 1:3000-1:10000**Species reactivity:** Rabbit**WB:** 1:3000-1:10000**Background:**

HKS23208 targets to Rabbit IgG (H+L) in ELISA and Western blot. It is highly specific to rabbit IgG and shows minimal reactivity for mouse, rat, human, pig, and bovine IgGs. Recombinant Secondary Antibodies are mixtures of precisely engineered recombinant monoclonal antibodies that recognize multiple complementary epitopes on the same IgG. Each recombinant clone in the final multiclonal mixture is carefully selected after rigorous characterization and screening to ensure the highest level of performance. The selected clones are mixed in various combinations, each of which is then functionally characterized in multiple applications to select the final multiclonal mixture with optimal performance. Each lot of Multi-rAb™ Secondary Antibodies is produced by mixing the same high performing recombinant clones every time to ensure that they have high batch-to-batch consistency, which in turn results in high reproducibility of experimental data.

RRID:

AB_3073505

Clonality:

Multiclonal recombinant

Purity:

The antibody was purified from culture media supernatant by immunoaffinity chromatography using Protein G beads.

Form:

Liquid

Storage Buffer:

PBS with 50% glycerol, 10 mg/mL BSA, 0.1% Proclin-300, pH 7.4.

Storage:

Store at -20 °C for one year.

Note:

This product is for research use only, not for diagnostic or therapeutic use.
